1. Introduction

1.1 What Ledger does

Ledger keeps the complete double-entry books of a Belgian company — an SRL, an SA, an SC, an association — or of a self-employed person. It follows the Belgian chart of accounts, the **PCMN** (*Plan comptable minimum normalisé*; in Dutch the *MAR, Minimum Algemeen Rekeningenstelsel*), and the Belgian VAT rules, and it produces the files the Belgian administration and banks work with:

- sales and purchase **invoices** and **credit notes**, with every Belgian VAT case: the 6, 12 and 21 % rates, intra-Community supplies and services, exports, the co-contractor's reverse charge, non-deductible VAT, the company car's 50 %;
- **quotes, orders, delivery notes** and **purchase orders**, each one turned into the next and finally into the invoice;
- documents **printed from templates** by Writer, in French, Dutch or English, with your letterhead;
- **bank and cash statements**, typed or **imported from your bank's CODA files**, the invoices they pay found and matched for you;
- **payments to your suppliers** as a **SEPA** credit transfer file for your bank;
- the periodic **VAT return** as an **Intervat** XML file, the **annual customer listing** and the **intra-Community listing**;
- **reports**: journals, general ledger, trial balance, balance sheet, income statement, customers' and suppliers' balances, receivables and payables by age — on screen, as Writer documents or as spreadsheets;
- the **year-end closing**, the year's result carried forward.

You type **documents** — an invoice, a bank statement — and never raw entries: Ledger builds the accounting entry, shows it while you type and posts it when you save. Everything is written to the company's file at once: there is no separate "save" step for the books.

1.2 Who it is for

Ledger is made for the people who keep their own books or those of a small business: a freelance designer, a consultant, a small shop, a small company with a few hundred invoices a year. Its features follow those of **BOB 50**, the Belgian accounting package, with the simplicity of **GnuCash**. You do not need to be an accountant to use it, but you should know the basics of double-entry bookkeeping: section 1.5 recalls them.

Important. Ledger helps you keep correct books and prepare your VAT files. It does not replace the advice of your accountant (*expert-comptable, accountant-boekhouder*): have your year-end figures checked by a professional before you file your annual accounts.

1.3 What you need

- Onyx, on a Raspberry Pi 4 (or the Onyx desktop simulator on a PC).
- **Writer**, installed with Onyx: it prints your quotes, invoices and reports.
- The **Spreadsheet** (optional): it opens reports as workbooks.

- To import bank statements: the **CODA** files your bank provides (from your online banking, usually `.cod` or `.txt` files), copied to the SD card.
- To file VAT returns: an access to **Intervat**, the SPF Finances' site, where you upload the XML files Ledger writes.

1.4 About this manual

- Buttons, menus and fields are written in **bold**, as on the screen: **Save**, **New invoice**.
- A menu command is written **File ► Open...**: the **File** menu, then its **Open...** item.
- Keys are written `Ctrl+N`, `Tab`, `Enter`, `Esc`, `F4`.
- Amounts are written the Belgian way: `1.234,56` — a dot groups the thousands, a comma separates the cents. Dates are written `28/09/2026`.
- The examples use the **demo company**, *Atelier Lumen SRL* (section 2.2). You can try everything on it: it is an ordinary file of its own, separate from your books.

1.5 Bookkeeping in a nutshell

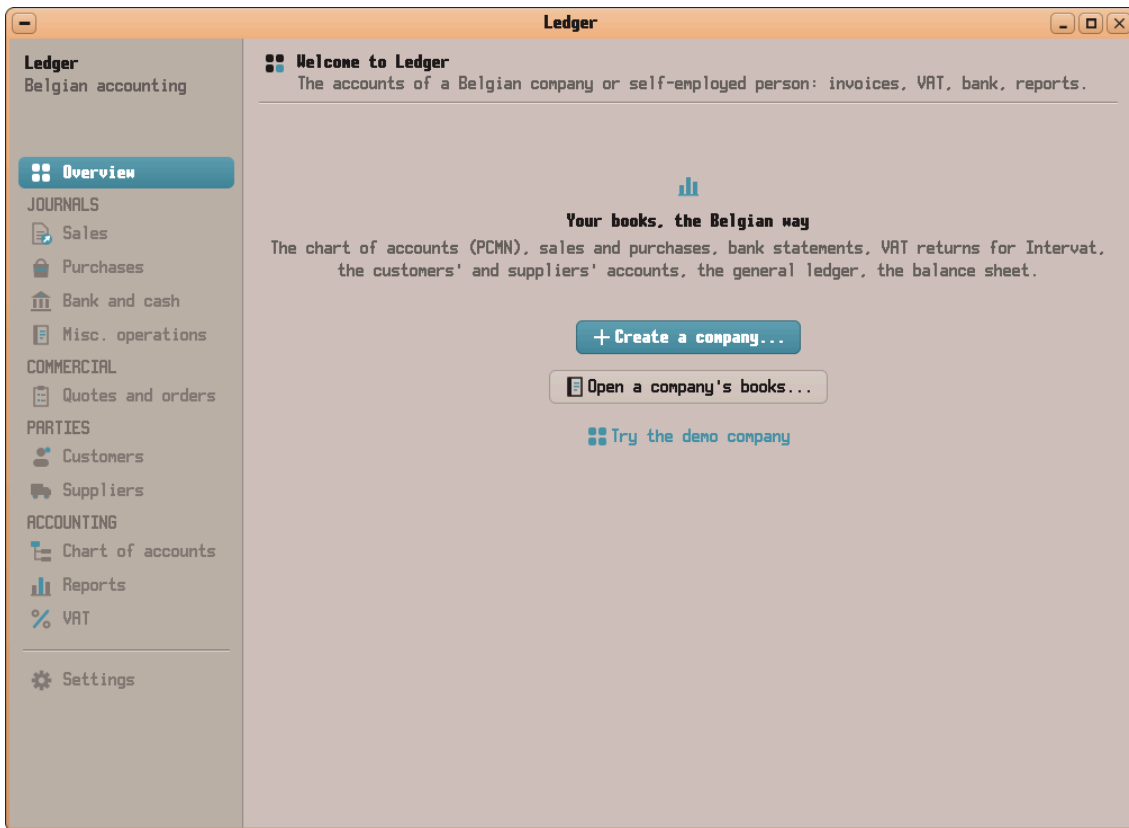

- **Accounts.** Every amount is recorded on the accounts of the chart. The PCMN numbers them by class: **1** equity and long-term debts, **2** fixed assets, **3** stocks, **4** receivables and payables (400000 customers, 440000 suppliers, 451000 VAT payable, 411000 VAT recoverable...), **5** bank and cash (550000, 570000), **6** charges, **7** income. Classes 1 to 5 make the **balance sheet**, classes 6 and 7 the **income statement**.
- **Double entry.** Every operation is an **entry** whose **debits** equal its **credits**. A sales invoice of 1.000,00 plus 210,00 VAT debits the customer 1.210,00 (he owes it to you) and credits the sales 1.000,00 (an income) and the VAT payable 210,00 (you owe it to the State). Ledger writes these lines for you.
- **Journals.** Entries are kept in **journals** by their kind — sales, purchases, bank, cash, miscellaneous operations —, each numbering its documents from 1 every fiscal year.
- **Debit and credit balances.** An account shows a **debit** balance (D) when its debits are more than its credits — an asset, a charge, a customer who owes you — and a **credit** balance (C) otherwise — equity, a debt, an income.
- **Matching** (*lettrage, afpunten*). An invoice and the payment that settles it are **matched**: together they come to zero on the party's account, and the invoice shows **Paid**. Ledger matches them when you record a payment against its invoice.
- **Fiscal year.** The period the accounts are closed for, usually the calendar year. At its end, its **result** — the income less the charges — is carried forward to the equity.

2. Getting started

2.1 Starting Ledger

Start **Ledger** from the Applications list (group **Productivity**) or the dock. Ledger also opens when you double-click a `.ledger` file in the File Viewer, or drop one on its window.

When it starts, Ledger opens the books it had open last time. The very first time, it shows its welcome page.

The welcome page: create your company, open existing books, or try the demo company.

2.2 Trying the demo company

Click **Try the demo company** to open `SD:/docs/demo-company.ledger`: *Atelier Lumen SRL*, a design studio with 23 customers and suppliers and about 330 documents from January 2025 to September 2026 — invoices, credit notes, bank statements, VAT returns filed, quotes and orders. Fiscal year 2025 is closed; 2026 is running. The demo is the best way to learn Ledger: every picture in this manual comes from it.

The demo also comes with a bank file, `SD:/docs/demo-bank-statement.cod`, to try the CODA import (section 9.3).

2.3 Creating your company

Click **Create a company...** on the welcome page, or choose **File ► New Company...**

The screenshot shows the 'New company' dialog box in the Ledger application. The dialog has the following fields and values:

- Company: Studio Nova SRL
- VAT number: BE0456789034
- Street: Rue Haute 120
- Postcode: 1000 City: Bruxelles
- E-mail: hello@studionova.be Phone: +32 2 555 12 34
- Bank account: BE22068999887747
- Chart of accounts: Français (PCMN)
- VAT: Files VAT returns Quarterly
- First fiscal year: 01/01/2026 to 31/12/2026

At the bottom of the dialog are 'Create' and 'Cancel' buttons. The background shows the Ledger application window with a sidebar menu and a 'Welcome to Ledger' message.

A new company: its name, VAT number, address, bank account, chart, VAT situation and first fiscal year.

1. Type the company's **name** with its legal form (*Studio Nova SRL*), its **VAT number** (*BE 0456.789.034* : Ledger checks it), its **street**, **postcode** and **city**, **e-mail**, **phone** and **bank account** (IBAN).
2. Choose the **chart of accounts**: **Français (PCMN)** or **Nederlands (MAR)**. The chart's language is also the language of your documents, unless a customer's card says otherwise.
3. Choose the **VAT** situation:
 - **Files VAT returns, Quarterly** or **Monthly**: the usual case;
 - **Small business franchise** (*régime de la franchise, vrijstellingsregeling*): you charge no VAT and file no periodic return;
 - **Not subject to VAT**: for an activity exempted by article 44 of the VAT code (a doctor, a training centre...).
4. Type the **first fiscal year**, its first and last day (*01/01/2026* to *31/12/2026*). A fiscal year may last up to 24 months (a company's first one often does).
5. Click **Create** and choose where to save the file: *SD:/docs/Studio Nova SRL.ledger* is proposed.

Ledger makes the books: the whole PCMN in the chosen language (almost 500 accounts), the journals — **VEN** sales, **ACH** purchases, **BNK** bank, **CAI** cash, **OD** miscellaneous operations (in Dutch: **VKP**, **AKP**, **BNK**, **KAS**, **DIV**) — and the first fiscal year. Everything can be changed afterwards in **Settings** (section 4).

Tip. Then go to **Settings ► Company** to add your legal form, register (*RPM Bruxelles*), BIC and web site: they appear on your printed documents. And to **Settings ► Journals** to type your bank account's IBAN in the **BNK** journal: the CODA import and the supplier payments need it.

2.4 Opening books, several companies

Each company has its own file. **File ► Open...** (**Ctrl+O**) opens another company's books; the one open is closed (it needs no saving). Keep as many companies as you like, one file each.

File ► Save a Copy As... writes a copy of the books under another name — before an experiment, or to give your accountant a copy.

The file's name is shown at the foot of the side bar, with a green dot. The dot turns red if the file could not be written (the card full or write-protected): the books are then kept in memory, and Ledger tells you so — save a copy elsewhere at once.

3. The window

3.1 Its parts

The Overview page of the demo company, and the parts of the window.

1. **The company** open: its name and VAT number.
2. **The fiscal year shown.** The lists, the reports and the VAT page show this year; choose another one here. New documents are dated in it.
3. **The pages**, grouped: the **Overview**; the journals — **Sales**, **Purchases**, **Bank and cash**, **Misc. operations**; **Quotes and orders**; the parties — **Customers**, **Suppliers**; the accounting — **Chart of accounts**, **Reports**, **VAT**; and **Settings**. A red **badge** counts what needs you: invoices overdue on **Sales** (orange on **Purchases**: your own late payments), a VAT return late on **VAT**.
4. **The file** of the books, and its state (green: written).
5. **The page's title**, and a line about it (here the fiscal year).
6. **The page's buttons.** The one in colour is its main action (here: a new sales invoice).
7. **The Overview's tiles:** what your customers owe you (and how much of it is overdue), what you owe your suppliers, the bank and cash, the year's result and turnover.
8. **The sales and purchases** of the year, month by month (excluding VAT).
9. **The next VAT return** (its period, due date and amount so far) and **the invoices most overdue** — click one to open it.

3.2 Lists

Most pages are lists: the sales, the statements, the customers...

- **Filters** at the top left: **All**, **Open**, **Overdue**, **Paid** for invoices.
- The **Search** box at the top right finds words anywhere in a row: a name, a description, a number, an amount (`1.657,70` or `1657.70`). Several words must all be found. `Ctrl+F` goes to it.
- Click a **column's title** to sort by it; click again to reverse the order.
- **Double-click** a row, or press `Enter`, to open it. `Delete` deletes the chosen row (when it may be deleted, and after asking).
- **Right-click** a row for its other commands.
- The **foot** of the list adds up the rows shown.

3.3 Documents

A document — an invoice, a statement, an operation, a quote — opens **in place of its list**. Its fields are at the top, its **lines** in a grid below, its totals at the bottom.

- **Save** (`Ctrl+S`) posts the document and goes back to the list; **Save & New** posts it and starts the next one; **Cancel** (`Esc`) leaves it — Ledger asks first when something was typed; the red **bin** deletes it.
- A field for a **party**, an **account** or a **VAT code** finds as you type: a name, a code, a VAT number, an account's number or words of its name. The list of what matches drops below; `Enter` or `Tab` takes the one lit, `F4` or `Alt+↓` shows them all.
- **Dates** can be typed `28/09/2026`, `28.9.26`, `28/9` (this year) or `280926`; the button at the right of a date field opens a calendar.
- **Amounts** can be typed `1850`, `1850,00`, `1.850,00` or `1850.00`.

New sales invoice
Type the customer, the dates, the lines; Save posts...

Cancel Save & New Save

Customer: Brou + Date: 28/09/2026

Brouwerij De Klok NV BROUWERI · Antwerpen DD/MM/YYYY

Description: What the invoice is for Kind: Invoice Credit note

Communication: Made when saved Reference: Order, your reference

Account	Description	Excl. VAT	VAT code	VAT	Total
+ Add a line					

The entry it makes
400000 Clients

Debit 0.00 Credit

Total excl. VAT 0.00

Total to pay 0.00

A party found as you type: "Brou" finds Brouwerij De Klok NV (its code, its city).

In the **grid of lines**, you type as in a spreadsheet:

Key	What it does
Tab, Enter	Take what was typed, go to the next cell; after the last one, a new line
Shift+Tab	The cell before
↑, ↓	The line above, below
Esc	Give back what the cell held (again: leave the grid)
F4, Alt+↓	The list of what can be typed in the cell
Ctrl+Delete	Remove the line (so does the cross at its end)

A cell that cannot take what you typed is outlined in red, and the reason is shown at the foot of the window.

3.4 Locked documents

A document cannot be changed or deleted once:

- its **fiscal year is closed** (section 15), or
- it holds VAT and the **VAT return of its period is marked filed** (section 14.3).

Its page then says **Locked** and why. To correct it, reopen the period or the year — or, better, post a correcting document (a credit note, a miscellaneous operation) in the current period.

Sales invoices are numbered without gaps, as the law requires: only the **last** sales document of a journal can be deleted. To cancel another one, make a **credit note** for it (section 6.5).

4. Setting up your books

4.1 The company

Settings ► Company holds what your documents print as their letterhead and what your VAT files declare.

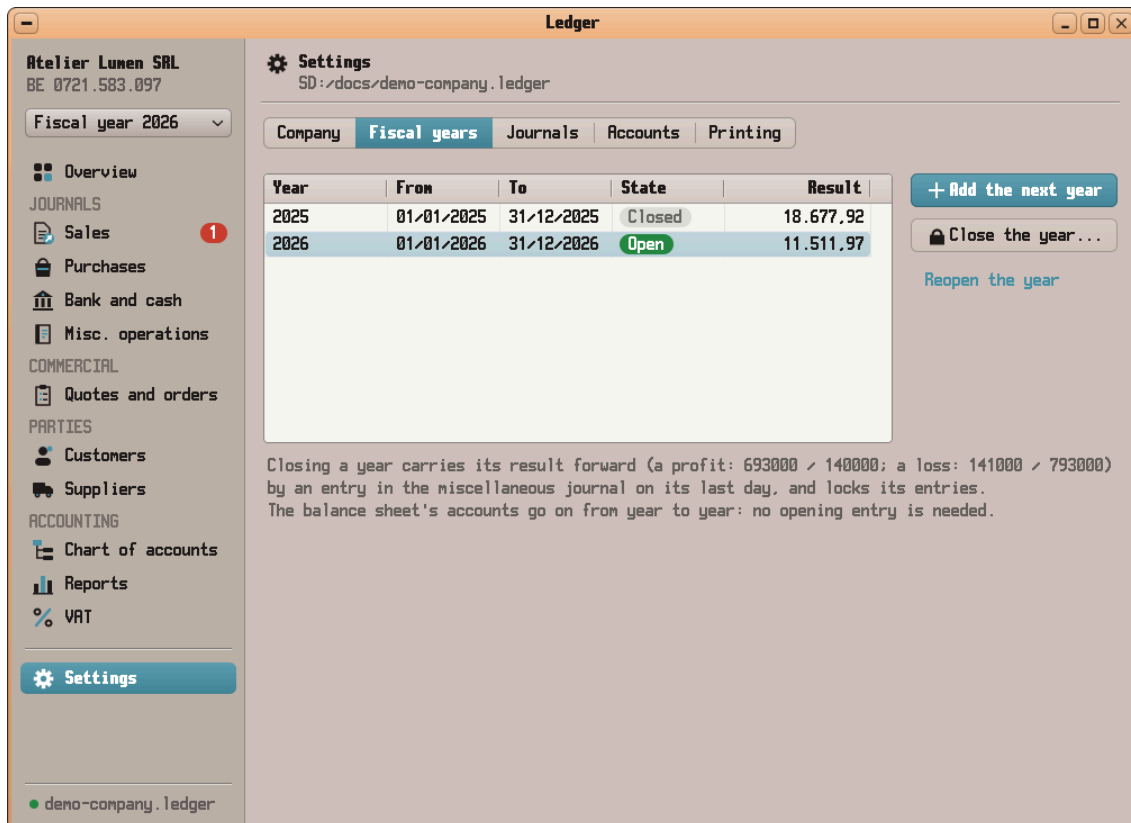

The screenshot shows the 'Ledger' application window with the 'Company' settings tab selected. The left sidebar contains a navigation menu with categories: Overview, JOURNALS (Sales, Purchases, Bank and cash, Misc. operations), COMMERCIAL (Quotes and orders), PARTIES (Customers, Suppliers), and ACCOUNTING (Chart of accounts, Reports, VAT). The 'Settings' button is highlighted in the sidebar. The main area displays the 'Company' settings for 'Atelier Lumen SRL' (BE 0721.583.097). The settings include: Name (Atelier Lumen SRL), Legal form (SRL), Street (Rue des Tanneurs 58), City (1000 Bruxelles), Country (BE), IBAN (BE41 3630 8123 4510), Register (RPM Bruxelles), VAT situation (Files VAT returns), VAT number (BE 0721.583.097, Valid), E-mail (compta@atelier-lumen.be), Phone (+32 2 512 44 90), BIC (BBRUBEBB), and Web site (www.atelier-lumen.be). A 'Save the changes' button is located at the bottom of the form.

The company's details: name, legal form, address, VAT number, contact, bank, register, web site, VAT situation.

- **Name** and **Legal form** (SRL, SA, SC, ASBL...).
- **Street**, **City** (postcode and city), **Country** (BE).
- **VAT number**: checked as you type (Valid, Wrong check digits, Not a VAT number).
- **E-mail**, **Phone**, **Web site**.
- **IBAN** and **BIC**: printed on your invoices.
- **Register**: the register of legal entities and its court, *RPM Bruxelles*, *RPR Gent*.
- **VAT situation** and **Returns**: as at the creation (section 2.3); change them if your situation changes.

Click **Save the changes**.

4.2 Fiscal years

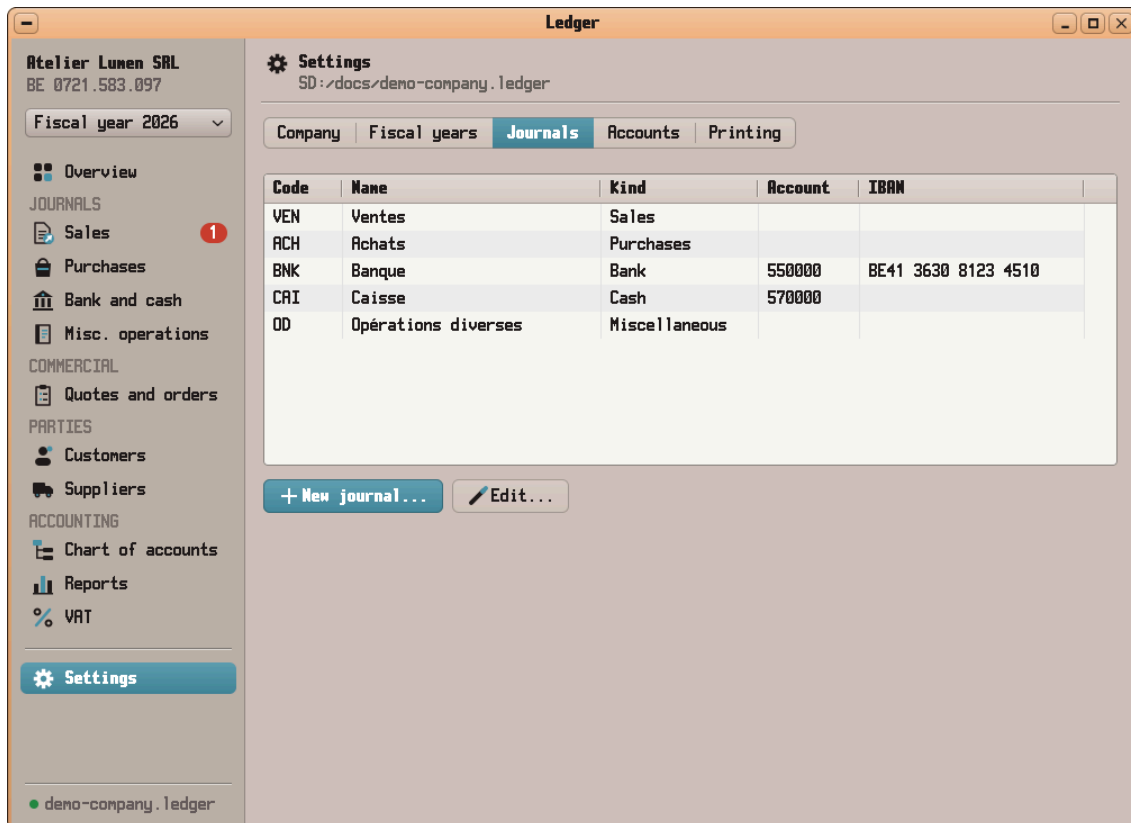

The fiscal years: their dates, their state and their result.

The list shows each fiscal year, its dates, its state (**Open** or **Closed**) and its **result** (profit or loss so far).

- **Add the next year** adds a year after the last one, as long as it.
- **Close the year...** and **Reopen the year**: see section 15.

The balance sheet's accounts carry on from year to year by themselves: you never type an opening entry between two years of the same books.

4.3 Journals

The screenshot shows the Ledger application window with the title bar "Ledger". The left sidebar contains a menu with categories: JOURNALS (Sales, Purchases, Bank and cash, Misc. operations), COMMERCIAL (Quotes and orders), PARTIES (Customers, Suppliers), and ACCOUNTING (Chart of accounts, Reports, VAT). The "Settings" button is highlighted at the bottom of the sidebar. The main area shows the "Settings" window for "demo-company.ledger". The "Journals" tab is selected, displaying a table of journals. Below the table are buttons for "+ New journal..." and "Edit...".

Company | Fiscal years | Journals | Accounts | Printing

Code	Name	Kind	Account	IBAN
VEN	Ventes	Sales		
ACH	Achats	Purchases		
BNK	Banque	Bank	550000	BE41 3630 8123 4510
CAI	Caisse	Cash	570000	
OD	Opérations diverses	Miscellaneous		

+ New journal... Edit...

The journals: their code, name, kind, account and IBAN.

A company needs one journal of each kind; add others when you want to keep documents apart — a second bank account, a second sales series (**VEN2** for a shop).

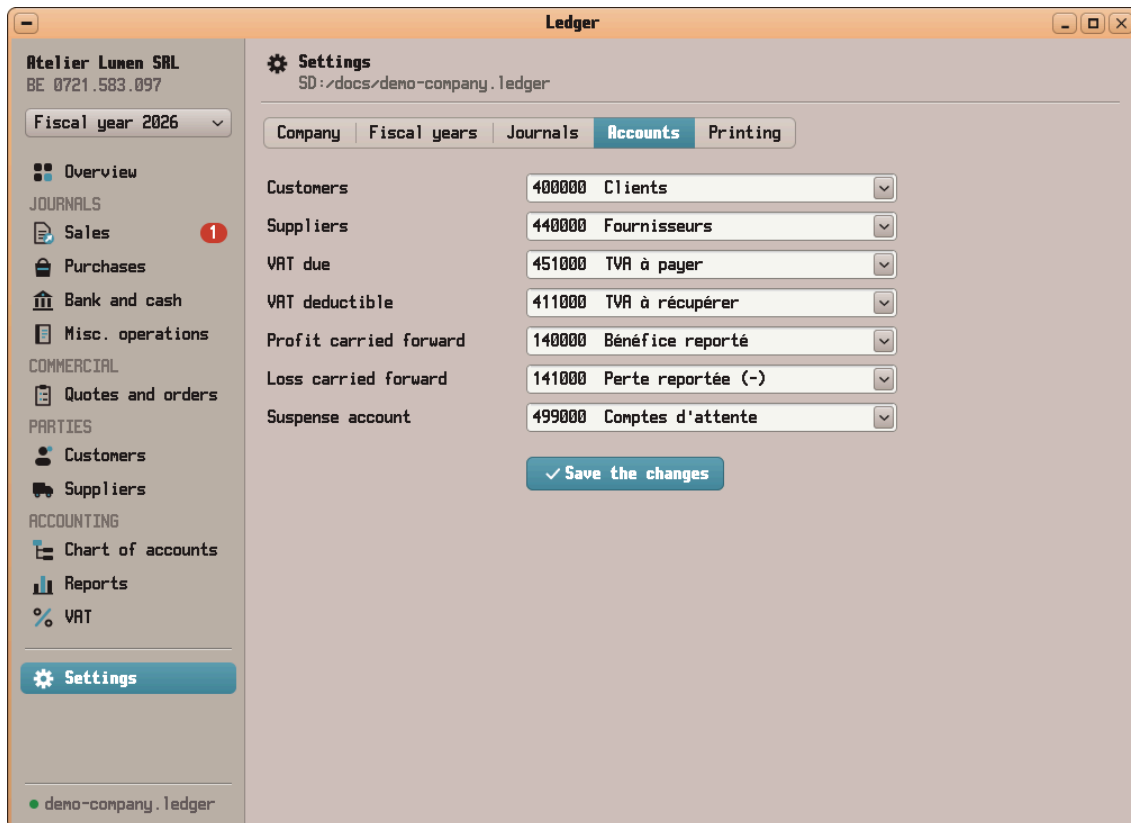

A bank journal: its code, name, kind, account (55xxxx) and IBAN.

Double-click a journal (or choose it and click **Edit...**), or click **New journal...**:

- **Code:** 1 to 5 letters or digits, printed in the document numbers (*VEN 2026/0054*).
- **Name** and **Kind:** sales, purchases, bank, cash or miscellaneous (a journal's kind cannot be changed once it has documents).
- **Account:** a bank journal's account (550000, 550100 for a second bank...), a cash journal's (570000).
- **IBAN:** the bank account's number. **The CODA import finds a statement's journal by it**, and the supplier payments are made from it.
- **Hidden:** a journal no longer offered for new documents (its documents stay).

4.4 The accounts by role

The accounts Ledger uses for its own entries.

Ledger posts some lines by itself — the customer's and supplier's side of an invoice, the VAT, the year's result. **Settings ► Accounts** says on which accounts: **Customers** (400000), **Suppliers** (440000), **VAT due** (451000), **VAT deductible** (411000), **Profit carried forward** (140000), **Loss carried forward** (141000) and the **Suspense account** (499000). Keep the PCMN's accounts unless your accountant asks otherwise.

4.5 The chart of accounts

Chart of accounts shows the PCMN as a tree — classes, groups, accounts — with each account's balance at the end of the fiscal year shown. Below, the chosen account's **register**: its lines of the year, the balance brought forward and the running balance.

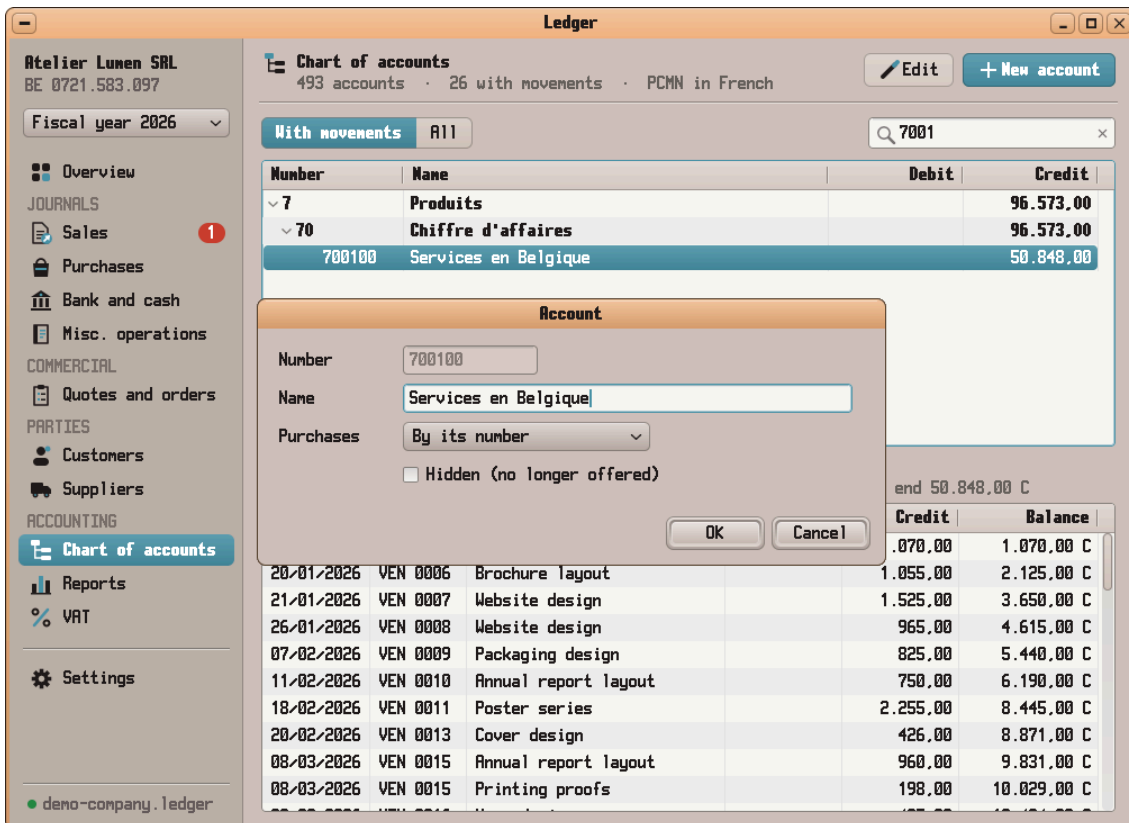

The screenshot shows the Ledger application interface. On the left is a sidebar with navigation options: Overview, JOURNALS (Sales, Purchases, Bank and cash, Misc. operations), COMMERCIAL (Quotes and orders), PARTIES (Customers, Suppliers), and ACCOUNTING (Chart of accounts, Reports, VAT, Settings). The main window is titled 'Ledger' and displays the 'Chart of accounts' for 'Atelier Lumen SRL' (BE 0721.583.097) for the fiscal year 2026. It shows 493 accounts, 26 with movements, and PCMN in French. A search box contains '7001'. The chart shows a tree structure with '7' (Produits) and '70' (Chiffre d'affaires) expanded, showing '700100 Services en Belgique' with a credit balance of 50.848,00. Below the chart, the register for '700100 Services en Belgique' is shown, detailing transactions for the year 2026 with columns for Date, Document, Description, Debit, Credit, and Balance.

Date	Document	Description	Debit	Credit	Balance
14/01/2026	VEN 0002	Catalogue		1.070,00	1.070,00 C
20/01/2026	VEN 0006	Brochure layout		1.055,00	2.125,00 C
21/01/2026	VEN 0007	Website design		1.525,00	3.650,00 C
26/01/2026	VEN 0008	Website design		965,00	4.615,00 C
07/02/2026	VEN 0009	Packaging design		825,00	5.440,00 C
11/02/2026	VEN 0010	Annual report layout		750,00	6.190,00 C
18/02/2026	VEN 0011	Poster series		2.255,00	8.445,00 C
20/02/2026	VEN 0013	Cover design		426,00	8.871,00 C
08/03/2026	VEN 0015	Annual report layout		960,00	9.831,00 C
08/03/2026	VEN 0015	Printing proofs		198,00	10.029,00 C

The chart: the accounts matching "7001"; the register of account 700100, the year's sales of services.

- **With movements** shows only the accounts used this year; **All** the whole chart.
- The search box finds an account by the start of its number (**7001**) or words of its name (**leasing**).
- Double-click a class or a group to fold or unfold it.
- Double-click a line of the register to open its document.

New account adds an account: its **number** (usually 6 digits, classes 0 to 7, not already in the chart) and its **name**. **Edit** changes the chosen account:

An account's card: its name, the nature of its purchases, hidden or not.

- **Name.**
- **Purchases:** the nature of what is bought on this account, which decides the VAT return's grid of its purchases — **Goods** (grid 81), **Services** (grid 82), **Investments** (grid 83), or **By its number** (60 goods, 61 services, 2x investments...).
- **Hidden (no longer offered):** the account stays in the chart and the reports but is no longer proposed as you type.

4.6 Starting with existing books

When you move to Ledger during a company's life, bring the balances over with one **miscellaneous operation** (section 10) dated the **first day** of your first fiscal year in Ledger, and tick **Opening balances**:

- one line per balance sheet account with its balance — the capital (100000) and the reserves on the credit side, the equipment (2x) and the bank (550000) on the debit side...;
- one line **per open invoice** on 400000 with its customer (debit) or on 440000 with its supplier (credit), so that each can be matched with its payment later;
- the difference, if any, on 499000 (the suspense account), to be cleared with your accountant.

Take the figures from the previous accounts' closing balance sheet and open items.

5. Customers and suppliers

5.1 The lists

Customers and **Suppliers** list the parties with their **code**, **name**, **VAT number**, **city**, **balance** and what is **overdue**. The filters show **All**, those **With a balance** or those **Overdue**; the search box finds a code, a name, a city, a VAT number or an e-mail.

The screenshot shows the Ledger application interface. On the left is a sidebar with navigation options: Overview, JOURNALS (Sales, Purchases, Bank and cash, Misc. operations), COMMERCIAL (Quotes and orders), PARTIES (Customers, Suppliers), ACCOUNTING (Chart of accounts, Reports, VAT), and Settings. The main window is titled 'Ledger' and shows the 'Customers' list. At the top, it indicates '12 customers · to receive 10.586,05 · overdue 1.657,70'. Below this are filters: 'All', 'With a balance', and 'Overdue'. A search box is also present. The list of customers is as follows:

Code	Name	VAT number	City	Balance	Overdue
AGENCELU	Agence Lunière Pa...	FR40303265045	Paris	0,00	
BRASSERI	Brasserie du Sabl...	BE 0745.321.175	Bruxelles	0,00	
BROUWERI	Brouwerij De Klok NV	BE 0439.127.611	Antwerpen	1.657,70	1.657,70
CHOCOLAT	Chocolaterie Van ...	BE 0562.019.879	Ixelles	1.784,75	
DESIGNZU	Design Zürich AG	CHE123456789	Zürich	0,00	
EDITIONS	Editions du Préau SA	BE 0669.023.153	Namur	7.143,60	
LIBRAIRI	Librairie Tropiqu...	BE 0428.137.709	Bruxelles	0,00	
MMECLAIR	Mme Claire Dubois		Uccle	0,00	

Below the list, the details for 'Brouwerij De Klok NV' are shown. It includes the address 'Kaai 7, 2000 Antwerpen' and email 'boekhouding@deklok.be'. There are checkboxes for 'Open items only' and buttons for 'Match' and 'Unmatch'. Below this is a table of transactions:

	Date	Document	Description	Due	Debit	Credit	Balance
	20/01/2026	VEN 0006	Brochure la...		1.276,55		1.276,55 D
	21/01/2026	VEN 0007	Website design		1.845,25		3.121,80 D
	07/02/2026	VEN 0009	Packaging d...		998,25		4.120,05 D
	28/02/2026	BNK 0004	Payment 202...			1.276,55	2.843,50 D
	28/02/2026	BNK 0004	Payment 202...			1.845,25	998,25 D
	15/03/2026	BNK 0005	Payment 202...			998,25	0,00
	25/08/2026	VEN 0054	Website design	24/09/2026	1.657,70		1.657,70 D
	02/09/2026	VEN 0056	Menu design		1.554,85		3.212,55 D
	15/09/2026	BNK 0017	Payment 202...			1.554,85	1.657,70 D

The customers; below, the chosen one's account: its invoices and payments, matched (the link) or open.

Below the list, the chosen party's **account** for the fiscal year shown: the balance brought forward, each invoice, credit note and payment, their **due** date (in red when past) and the **running balance** (D: the party owes you, C: you owe the party). A link icon marks the lines already **matched**. Double-click a line to open its document.

5.2 A party's card

Click **New customer** (or **New supplier**), or double-click a party, or choose it and click **Card**. A new party can also be made while typing a document: the **+** button at the right of its party field.

A customer's card: its code, payment terms, VAT number and situation, language, address, bank, usual account.

- **Name**, and a **Code** — made from the name when left empty (*BROUWERI*); you may type your own.
- **Payment terms**: the days until an invoice is due (30 by default). An invoice's due date follows.
- **VAT number**: checked as you type — **Valid Belgian number**, **EU number (its form)**, **Its check digits are wrong**. Typing it also fills the **VAT situation** and the **Country**.
- **VAT situation**: it decides the VAT codes proposed on the party's documents (section 6.3):
 - **Belgian, subject to VAT**: the normal rates (V21, A21...);
 - **Private person (no VAT number)**: the normal rates; the customer is left out of the customer listing;
 - **Other EU country, VAT number**: intra-Community (VEUS services, VEUG goods for a customer; AEUS21, AEU21 for a supplier);
 - **Outside the EU**: exports (VEX), or services from abroad (AWS21);
 - **Belgian co-contractor (reverse charge)**: building works, the customer pays the VAT (VCC, ACC21).
- **Language**: **French**, **Dutch** or **English** — the language of the party's printed quotes, orders and invoices.
- **Street**, **Postcode**, **City**, **Country** (its code: **BE**, **FR**, **NL** ...).
- **E-mail**, **Phone**.
- **IBAN** and **BIC**: a supplier's account is needed to pay it by SEPA (section 8); a customer's lets the CODA import recognise its payments.
- **Account**: the account proposed on its documents' lines (a customer: 700100 *services in Belgium*; a supplier: 612000 *rent*...).

- **VAT code:** a code of its own, else **By its situation**.
- **Notes:** anything to remember.

To delete a party, choose it and press [Delete](#). A party that has documents, quotes or orders cannot be deleted: its card stays with them in the books.

5.3 Matching

Ledger matches an invoice with its payment when you record the payment (section 9.2): nothing to do most of the time. To match lines yourself — an invoice paid in two parts, a credit note that offsets an invoice:

1. In the party's account, tick the lines (click their box, or [Space](#)). The **Match** button shows the sum of the lines ticked.
2. When they come to **zero**, click **Match**: they are marked with a link and the invoice shows **Paid**.

Unmatch undoes the matching of the chosen line. **Open items only** shows only the lines not yet matched, of every year.

6. Sales

6.1 The sales

Sales lists the sales invoices and credit notes of the fiscal year: their **number**, **date**, **customer**, **description**, **total** and **status**.

No.	Date	Customer	Description	Total	Status
0061	26/09/2026	Chocolaterie Van H...	Catalogue	1.784,75	Due 26/10
0060	20/09/2026	Editions du Préau SA	Printed books...	2.692,40	Due 19/11

0047	26/07/2026	Mme Claire Dubois	Brochure layout	2.885,85	Paid
0046	23/07/2026	Théâtre du Canal ASBL	Catalogue	1.524,60	Paid
0045	19/07/2026	Design Zürich AG	Brochure layout	2.115,00	Paid
0044	19/07/2026	Studio Kaa SRL	Menu design	2.504,70	Paid
0043	15/07/2026	Agence Lunière Par...	Brochure layout	2.491,00	Paid
0042	08/07/2026	Studio Noord BV	Visual identity	695,00	Paid
0041	24/06/2026	Studio Kaa SRL	Website design	3.303,30	Paid
0040	21/06/2026	Agence Lunière Par...	Visual identity	1.660,00	Paid

The sales of 2026: paid, due, late, a credit note settled.

Status	Meaning
Paid	The invoice is matched with its payment
Due 26/10	Open, due on that day
4 days late	Open and past its due date
Settled	A credit note matched (with its invoice or a refund)
Credit open	A credit note not yet used

A credit note is marked **CN** after its number. **All**, **Open**, **Overdue** and **Paid** filter the list; when a kind of document has several journals, a list chooses one of them or **All the journals**.

6.2 A sales invoice, step by step

Click **New invoice** (**Ctrl+N**), or **Invoice** on the Overview, or **Documents ► Sales Invoice**.

New sales invoice
Type the customer, the dates, the lines; Save posts...

1 Customer: Brouwerij De Klok NV
Kaai 7, 2000 Antwerpen · BE 0439.1...

2 Date: 28/09/2026
Due date: 28/10/2026 30 days

3 Description: Beer labels: design and proofs

4 Kind: Invoice Credit note

5 Communication: Made when saved

6 Reference: Order, your reference

7

Account	Description	Excl. VAT	VAT code	VAT	Total
700100 Services...	Label design, 3...	1.850,00	V21 21 %	388,50	2.238,50
700100 Services...	Printing proofs	240,00	V21 21 %	50,40	290,40 x
+ Add a line					

8 The entry it makes

	Debit	Credit
400000 Brouwerij De Klok NV	2.528,90	
700100 Services en Belgique		1.850,00
700100 Services en Belgique		240,00
451000 TVA à payer		438,90

9

Total excl. VAT	2.090,00
VAT V21 (21 %)	438,90
Total to pay	2.528,90

10

A sales invoice being typed: two lines at 21 %; below, the entry it will post and its totals.

- Customer:** type a few letters of its name, its code or its VAT number and take it from the list (or click + to make a new card). Its address and VAT number show below.
- Date** and **Due date:** today (or the fiscal year's nearest day), and the date plus the customer's payment terms; the number of days is shown.
- Description:** what the invoice is for (*Beer labels: design and proofs*); it shows in the lists and on the printed invoice.
- Kind:** **Invoice** or **Credit note**.
- Communication:** the Belgian **structured communication** (+++123/4567/89012+++) the customer will put on the payment. Leave it empty: Ledger makes it from the invoice's number when it saves it, and prints it on the invoice. Your bank's CODA files then give it back with the payment, which finds its invoice.
- Reference:** the customer's order number or reference, printed on the invoice.
- The lines:** for each one, the **account** (the customer's usual one is proposed: 700100...), a **description**, the amount **excluding VAT** and the **VAT code** (proposed from the customer's situation, section 6.3). The **VAT** is computed — type another amount when the invoice says otherwise (it is then shown in blue) — and so is the line's **total**.
- The entry it makes:** the customer debited, the sales and the VAT credited — as it will be posted.

9. **The totals:** excluding VAT, the VAT of each code, the **total to pay**.

10. **Save** posts the invoice and goes back to the list; **Save & New** posts it and starts the next one.

The invoice gets the journal's next number (*VEN 2026/0062*). It now shows in the customer's account, in the VAT return of its period and in every report.

Customer: Brouwerij De Klok NV
Kaai 7, 2000 Antwerpen · BE 0439.1...

Date: 25/08/2026
Due date: 24/09/2026 (30 days)

Description: Website design
Kind: Invoice Credit note

Communication: ***202/6000/05448***
Reference: Order, your reference

Account	Description	Excl. VAT	VAT code	VAT	Total
700100	Services...	1.370,00	V21 21 x	287,70	1.657,70 x
+ Add a line					

The entry it makes

	Debit	Credit
400000 Brouwerij De Klok NV	1.657,70	
700100 Services en Belgique		1.370,00
451000 TVA à payer		287,70

Total excl. VAT: 1.370,00
VAT V21 (21 x): 287,70

Total to pay: 1.657,70

A saved invoice: "Open, overdue since 24/09/2026", its structured communication; Print makes it in Writer.

6.3 The VAT codes of sales

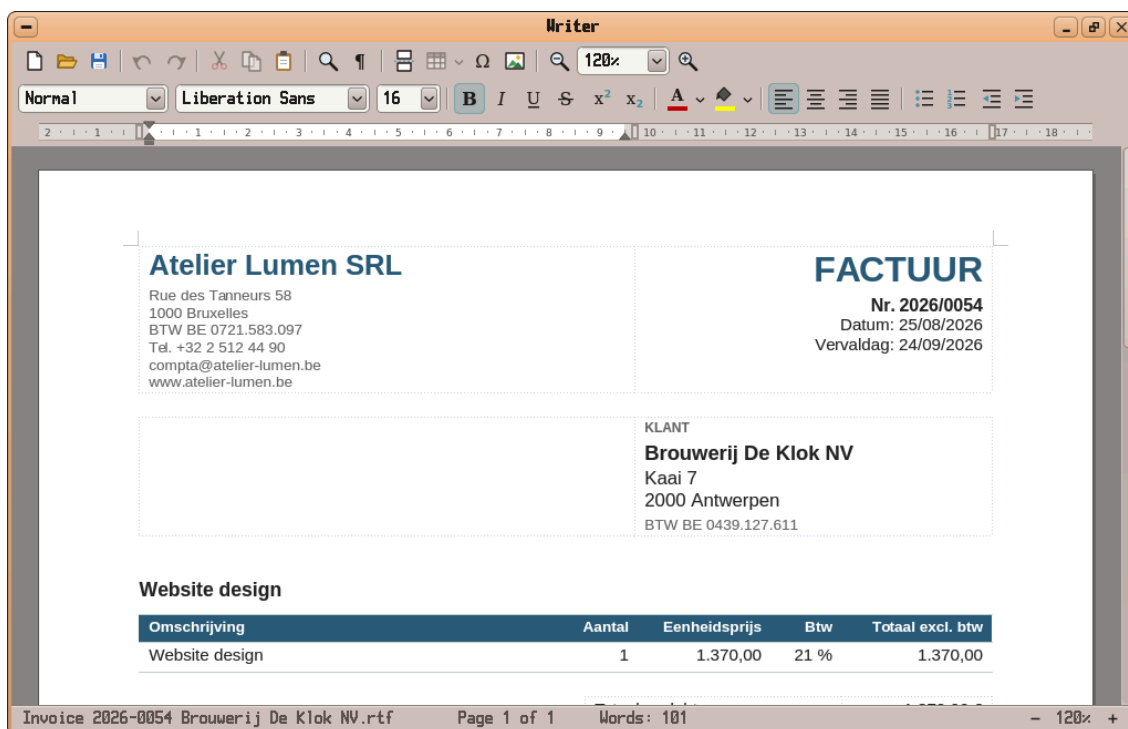

Code	Use it for	VAT return
V21, V12, V6	Sales in Belgium at 21, 12 or 6 %	Grids 03, 02, 01 and 54
V0	Sales at 0 % (newspapers...)	Grid 00
VCC	Works for a Belgian co-contractor: the customer pays the VAT	Grid 45
VEUG	Goods to a company in another EU country	Grid 46, intra-Community listing
VEUS	Services to a company in another EU country	Grid 44, intra-Community listing
VEUT	Triangular sales (ABC) within the EU	Grid 46, intra-Community listing
VEX	Exports outside the EU	Grid 47
VX	Exempt operations (article 44), outside the return	—

The code is proposed from the customer's **VAT situation**, or its card's own **VAT code**. Credit notes go to grids 48 (intra-Community) and 49 (others), their VAT to grid 64. Appendix A lists every code.

Note. On a printed invoice, the VAT detail carries the legal mention its codes need — an intra-Community reverse charge (art. 39bis, art. 21 § 2), the co-contractor's reverse charge (art. 20 of Royal Decree no. 1), an export (art. 39), an exemption (art. 44) —, in the invoice's language.

6.4 Printing an invoice

On a saved invoice, click **Print** — or right-click it in the list and choose **Print**. Ledger hands its data to **Writer**, which makes the invoice from its template and shows it: print it, or save it again as `.docx` or `.odt`. See section 12.

The same invoice printed: in Dutch, the customer's language — "FACTUUR".

6.5 Credit notes

A credit note cancels all or part of an invoice. In the list, right-click the invoice and choose **Make a credit note for it**: a credit note opens with the same customer and lines and a description *Credit note for VEN 2026/0054*; change the amounts if only a part is credited, and save.

The screenshot shows the 'Ledger' application window. On the left is a sidebar with navigation options: Overview, JOURNALS (Sales, Purchases, Bank and cash, Misc. operations), COMMERCIAL (Quotes and orders), PARTIES (Customers, Suppliers), ACCOUNTING (Chart of accounts, Reports, VAT), and Settings. The main window displays a 'Sales' list with 61 documents, 4 open, and 1 overdue. The list is filtered by 'All' status. A table of sales documents is shown with columns: No., Date, Customer, Description, Total, and Status. Document 0054 is highlighted, and a right-click context menu is open over it, showing options: Open, Print, Make a credit note for it, and Delete... The status of document 0054 is '4 days late'.

No.	Date	Customer	Description	Total	Status

0040	21/06/2026	Agence Lunière Par...	Visual identity	1.660,00	Paid

demo-company.ledger 61 documents shown Excl. VAT 96.573,00 VAT 11.974,53 Total 108.547,53

Right-clicking a sale: open it, print it, make a credit note for it, delete it.

You can also click **Credit note** at the top of the list for a credit note of your own. Once saved, match it with its invoice in the customer's account (section 5.3) when it settles it.

6.6 Changing a sale

Open a sale, change it and save: its entry is posted again, with the same number. Its payment stays matched as long as its total does not change. A sale cannot be changed once its VAT return is filed or its year closed (section 3.4).

7. Purchases

7.1 The purchases

Purchases lists the purchase invoices and credit notes of the fiscal year, like the sales, with the **supplier's own number** in place of the description.

The purchases of 2026: two still to pay.

Its statuses are those of the sales, plus **Transfer sent**: the invoice is in a SEPA payment file (section 8) and waits for the bank statement that pays it.

7.2 A purchase invoice

Click **New purchase**, or **Purchase** on the Overview, or **Documents ► Purchase Invoice**. You type it as a sales invoice (section 6.2), with these differences:

- **Their number**: the supplier's invoice number (*F2026-4569*). Ledger warns you if the same supplier already has an invoice with that number this year: a purchase posted twice.
- **Communication**: the structured communication printed on the supplier's invoice, if any. Ledger checks its digits; the SEPA payment uses it.
- The **account** of each line: a charge (60 goods, 61 services, 62 salaries...) or, for equipment, a fixed asset (2x). The supplier's usual account is proposed.
- The **VAT code**: see section 7.3. With reverse charges, the entry shows both sides: the VAT due and the same VAT deductible.

Purchase invoice ACH 2026-0054
Paid (matched)

Supplier: Autolease Belgium SA
Avenue de Tervueren 270, 1150 Woluwe...

Date: 03/09/2026
Due date: 18/09/2026 (15 days)

Description: Car lease

Kind: Invoice

Communication: ***123/4567/89012***

Their number: F2026-4569

Account	Description	Excl. VAT	VAT code	VAT	Total
610220	Leasing ...	560,00	A21D50 21 %	117,60	677,60
+ Add a line					

The entry it makes

	Debit	Credit
440000 Autolease Belgium SA		677,60
610220 Leasing opérationnel ...	560,00	
610220 Leasing opérationnel ...	58,80	
411000 TVA à récupérer	58,80	

Total excl. VAT: 560,00
VAT A21D50 (21 %): 117,60

Total to pay: 677,60

A car lease: VAT code A21D50 — half of the VAT deductible (58,80), the other half added to the charge.

7.3 The VAT codes of purchases

Code	Use it for	VAT return
A21, A12, A6	Purchases in Belgium, VAT deductible	Grids 81/82/83 and 59
A0	Purchases at 0 % or exempt	Grids 81/82/83
A21D50	A company car: half of the VAT deductible	Grids 81/82/83 and 59
A21ND, A12ND	VAT not deductible (restaurants, gifts...): added to the charge	Grids 81/82/83
AEU21, AEU12, AEU6	Goods bought in another EU country	Grids 86, 55 and 59
AEUS21	Services bought in another EU country	Grids 88, 55 and 59
ACC21, ACC12, ACC6	Works from a Belgian co-contractor	Grids 87, 56 and 59
AWS21	Services from outside the EU	Grids 87, 56 and 59
AIM21	Imports, VAT deferred (licence ET 14000)	Grids 87, 57 and 59

The grid of the purchase itself — **81** goods, **82** services, **83** investments — follows the line's account (its **Purchases** nature, section 4.5). Credit notes received go to grids 84 or 85, their VAT to grid 63.

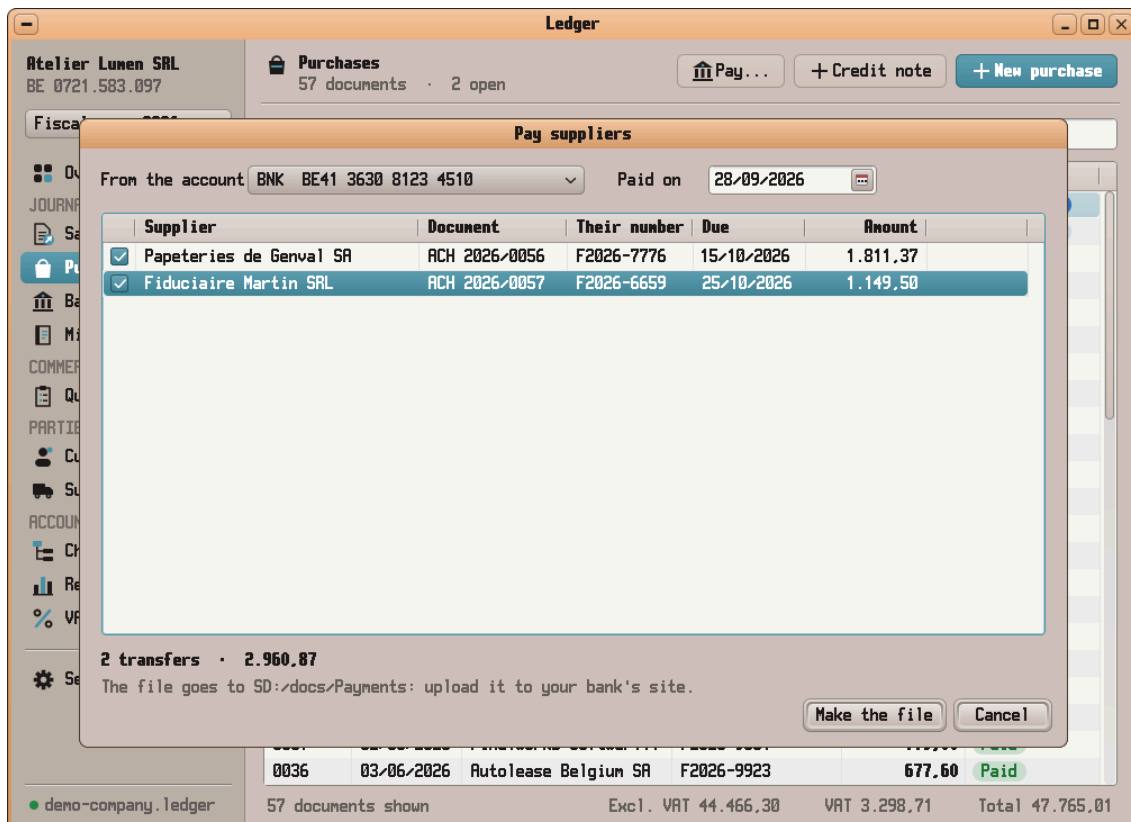

7.4 Purchase credit notes

Click **Credit note**, or right-click an invoice and choose **Make a credit note for it**. Type the supplier's credit note number in **Their number**.

8. Paying your suppliers (SEPA)

Ledger writes the **SEPA credit transfer** file (the ISO 20022 *pain.001* format all Belgian banks accept) that pays several invoices at once: upload it to your bank's site and confirm there.

1. In **Purchases**, click **Pay...** (or choose **Tools ► Pay Suppliers (SEPA)...**).
2. Choose the account you pay **From** (a bank journal with its IBAN) and the day the bank **Pays**.
3. Tick the invoices to pay. Those due within a week of that day are ticked for you. A supplier without an IBAN on its card shows **No IBAN** and cannot be ticked: complete its card. An invoice already in a file shows **In a file**.
4. Check the number of transfers and their total, and click **Make the file**.

Two invoices ticked: two transfers, 2.960,87 in all.

The file is written in `SD:/docs/Payments`, named after the day (*SEPA 2026-09-28 123400.xml*). Each transfer carries the supplier's name, address, IBAN and BIC, and its structured communication — else the supplier's invoice number. The invoices then show **Transfer sent**, until the bank statement that pays them is recorded (typed or imported): they are matched then.

9. Bank and cash

9.1 The statements

Bank and cash lists the bank and cash statements of the fiscal year: their number, date, description, journal, the money **in** and **out**, and the **new balance**.

No.	Date	Description	Journal	In	Out	New balance
0018	28/09/2026	Statement 42	BNK	5.142,36	5.534,65	41.540,81
0017	15/09/2026	Statement 41	BNK	7.431,82	4.741,00	41.933,10
0016	31/08/2026	Statement 40	BNK	12.408,65	5.784,89	39.242,28
0015	15/08/2026	Statement 39	BNK	9.642,95	4.256,41	32.618,52

0001	15/01/2026	Statement 25	BNK		4.744,41	25.255,62

The bank statements of 2026, their movements in and out, and the balance after each.

9.2 Typing a statement

Click **New statement** (or **Statement** on the Overview, or **Documents ► Bank Statement**).

1. **Journal**: the bank or cash journal. Its **old balance** — the balance after the last statement — is shown.
2. **Date**: the statement's date. **Description**: the number after the journal's last statement is proposed (*Statement 43* after *Statement 42*).
3. **New balance**: the balance your bank's statement prints. Optional, but recommended: Ledger then checks the movements against it and shows **Balanced**, or **Off by** the difference.
4. The **movements**, one per line:
 - **Party or account**: the customer or supplier who paid or was paid (type its name or code), or an account for anything else — bank charges 657200, the VAT paid to the State 451200, a salary 618000;
 - **Description**: the bank's communication;
 - **Amount**: positive for money **in**, negative for money **out** (-238,37).

- When a movement has a party, its **open items** — its invoices not yet paid — show below. **Tick** those the movement pays: the amount follows them. Typing the amount first ticks the one item that is as much. And a **structured communication** typed in the description finds its invoice by itself.
- Save**. The items ticked are matched with their payment: the invoices show **Paid**.

+ Add a movement

Open items of Studio Kaa SRL · tick those this movement pays

	Date	Document	Description	Due	Amount
☒	17/09/2026	VEN 2026/0059	Label design	01/11/2026	2.802,36

A statement: each payment's invoice in "Pays"; below, the item a movement paid, ticked.

A statement saved can be opened again: the **Pays** column shows the invoice each movement paid, and the items list shows them ticked.

9.3 Importing CODA files

Belgian banks deliver their statements as **CODA** files (*Coded Statement of Account*, Febelfin's standard). Download them from your online banking — often in the *Documents* or *CODA* section; some banks send them to your accountant, who can pass them to you — and copy them to the SD card.

- In **Bank and cash**, click **Import CODA** (or **Tools ► Import CODA...**) and choose the file.
- Ledger reads its statements — a file can hold several —, finds each one's **journal by its IBAN**, and skips those already in your books.
- Each statement opens, **already completed**:
 - a payment with a **structured communication** finds its invoice — a sale or a purchase —, which is ticked;
 - otherwise the counterparty is found by its **IBAN** (a card's) or its **name**, and its open item of the same amount is ticked (or all its items, when together they make the amount);
 - the **bank charges** go to 657200;
 - what is not found shows **To complete** in red: type its party or account.

4. The page's title line says what is left: *CODA: 1 movement to complete*. Complete it and click **Save**: the statement is posted and the next one of the file shows, until the last.

Party or account	Description	Amount	Pays
Editions du Préau SA	EDITIONS DU PRÉAU SA...	+4.451,20	VEN 2026/0052
Brouwerij De Klok NV	BROUWERIJ DE KLOK NV...	+1.657,70	VEN 2026/0054
Editions du Préau SA	EDITIONS DU PRÉAU SA...	+2.692,40	VEN 2026/0060
Papeteries de Genval SA	PAPETERIES DE GENVAL...	-1.811,37	ACH 2026/0056
657200 Frais bancaires	Frais de gestion du ...	-12,40	
To complete: a party or an...		+250,00	

Date	Document	Description	Due	Amount
12/08/2026	VEN 2026/0052	Exhibition catalogues	11/10/2026	4.451,20
20/09/2026	VEN 2026/0060	Printed books (500 copies)	19/11/2026	2.692,40

The demo's CODA file imported: five movements found (their invoices ticked), one to complete.

Tip. Try it on the demo: **Import CODA** ► [demo-bank-statement.cod](#) ► **Open**. Janssens Pieter's 250,00 is not a known party: type an account (a sundry income, say) or make him a card with +.

If Ledger says **No bank journal has the account BE..**, type that IBAN in the bank journal (**Settings** ► **Journals**) and import the file again. If it says **the bank's old balance is not the books'**, a statement is missing between the last one in your books and this one: import it first.

9.4 Cash

A **cash statement** (**Documents** ► **Cash Statement**, or **New statement** with the cash journal chosen) is typed like a bank statement: cash sales in, small purchases out, the day's or the month's movements.

10. Miscellaneous operations

Misc. operations keeps the entries that are neither invoices nor statements: depreciation, salaries booked from your social secretariat's summary, accruals, corrections, opening balances, and the VAT settlements Ledger posts itself (section 14.3).

No.	Date	Description	Lines	Amount	Kind
0002	30/06/2026	VAT settlement Q2 2026	3	5.243,07	VAT settlement
0001	31/03/2026	VAT settlement Q1 2026	3	3.615,93	VAT settlement

The miscellaneous operations of 2026: the VAT settlements of Q1 and Q2.

Click **New operation**:

1. **Journal**, **Date** and **Description** (*Depreciation of the equipment 2026*).
2. The lines: the **account**, the **party** when the account is a customers' or suppliers' one (a line on 400000 needs its customer), a **description**, the **debit** or the **credit**, and a VAT code when the line must count in the VAT return (a regularisation: codes R61, R62).
3. The title line shows the total **debit**, **credit** and the **difference**. **Balance it on this line** puts the difference on the line you are in.
4. **Save** when it **balances**.

Description Depreciation of the equipment 2026

☐ Opening balances

Account	Party	Description	Debit	Credit	VAT
630200 Dotations au...		Depreciation 2026	1.425,00		
230009 Installation...		Depreciation 2026		1.425,00	x
+ Add a line					

Debit 1.425,00

Credit 1.425,00

Balanced

Balance it on this line

A depreciation: 630200 debited, 230009 credited, 1.425,00 each — balanced.

Tick **Opening balances** for the entry that brings over the balances of your previous books (section 4.6); it is marked **Opening** in the list.

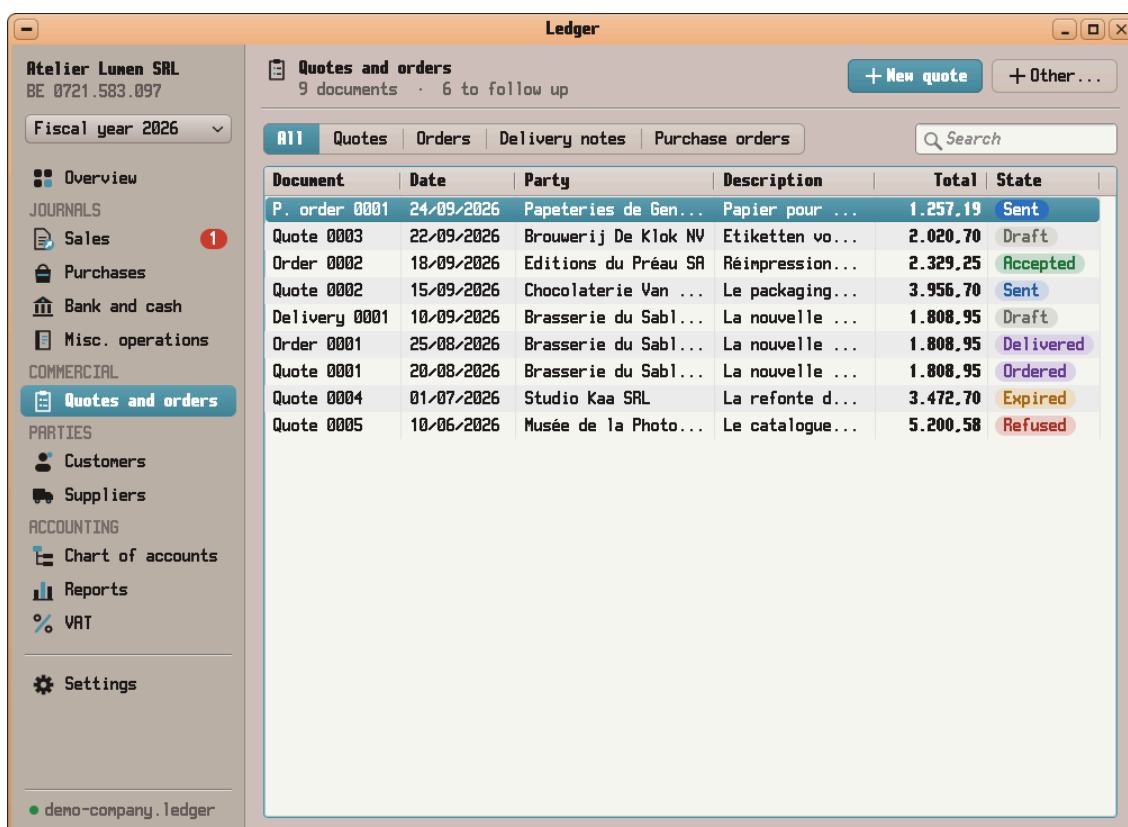

11. Quotes, orders and delivery notes

11.1 The commercial documents

Quotes and orders keeps the documents that come before an invoice. They are **not posted**: they change neither the accounts nor the VAT.

Document	What it is
Quote	A price offered to a customer, valid until a date (30 days by default)
Order	A customer's order (made from its quote, or typed) with its delivery date
Delivery note	What was delivered, to be signed by the customer
Purchase order	What you order from a supplier

Each kind is numbered by year: *Quote 2026/0003*.

The quotes, orders, delivery notes and purchase orders of the year, and their state.

The filters show **All** or one kind; the **state** tells where each document stands:

State	Meaning
Draft	Being prepared
Sent	Sent to the customer (or the supplier)
Accepted	The customer said yes

State	Meaning
Refused	The customer said no
Expired	A quote past its validity, neither accepted nor refused
Ordered, Delivered, Invoiced	Done: what followed it

11.2 A quote

Click **New quote** (or **Other...** for an order, a delivery note or a purchase order; or the **Documents** menu).

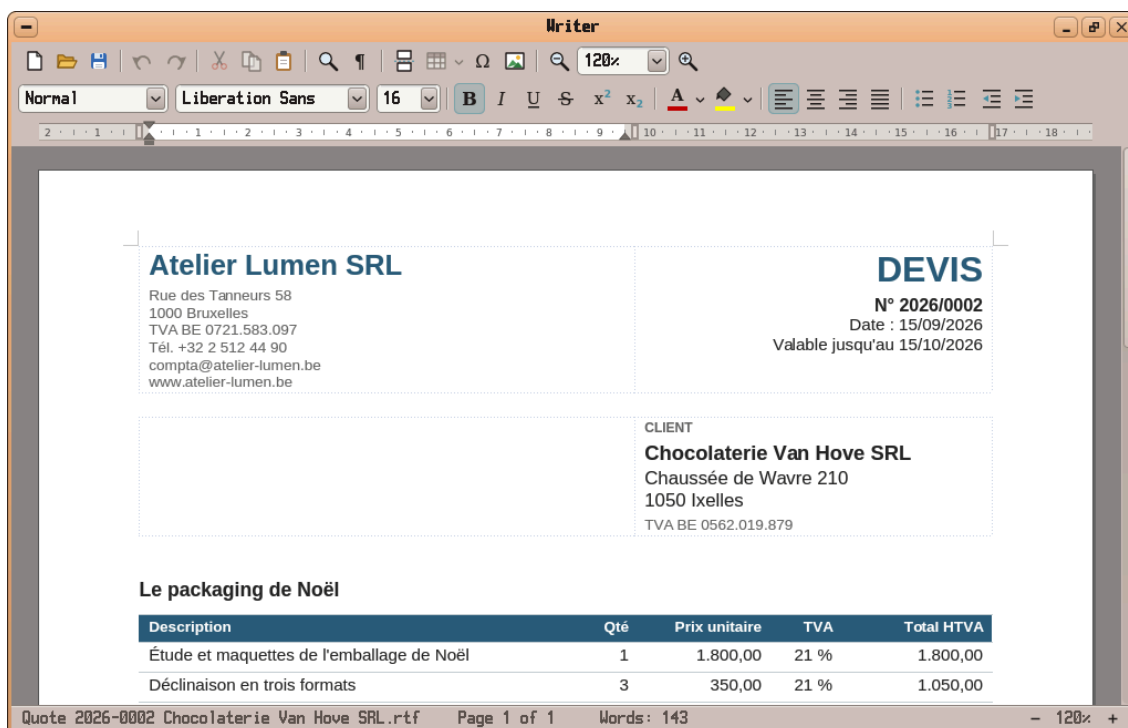

The screenshot shows the 'Ledger' application window. On the left is a sidebar with navigation options: Overview, JOURNALS (Sales, Purchases, Bank and cash, Misc. operations), COMMERCIAL (Quotes and orders), PARTIES (Customers, Suppliers), ACCOUNTING (Chart of accounts, Reports, VAT), and Settings. The main area displays a 'Quote 2026/0002' form. The form includes fields for Customer (Chocolaterie Van Hove SRL), Date (15/09/2026), Valid until (15/10/2026), Description (Le packaging de Noël), and State (Sent). A table lists three items: 'Étude et maquettes de l'emballage de Noël' (1 unit, 1.800,00), 'Déclinaison en trois formats' (3 units, 350,00), and 'Bons à tirer et suivi de fabrication' (1 unit, 420,00). The bottom right shows a summary: Total excl. VAT 3.270,00, VAT 686,70, and Total 3.956,70.

Description	Quantity	Unit price	VAT code	Total
Étude et maquettes de l'emballage de Noël	1	1.800,00	V21 21 x	1.800,00 x
Déclinaison en trois formats	3	350,00	V21 21 x	1.050,00
Bons à tirer et suivi de fabrication	1	420,00	V21 21 x	420,00

Total excl. VAT	3.270,00
VAT	686,70
Total	3.956,70

A quote: three lines — quantity times unit price —, its VAT and total.

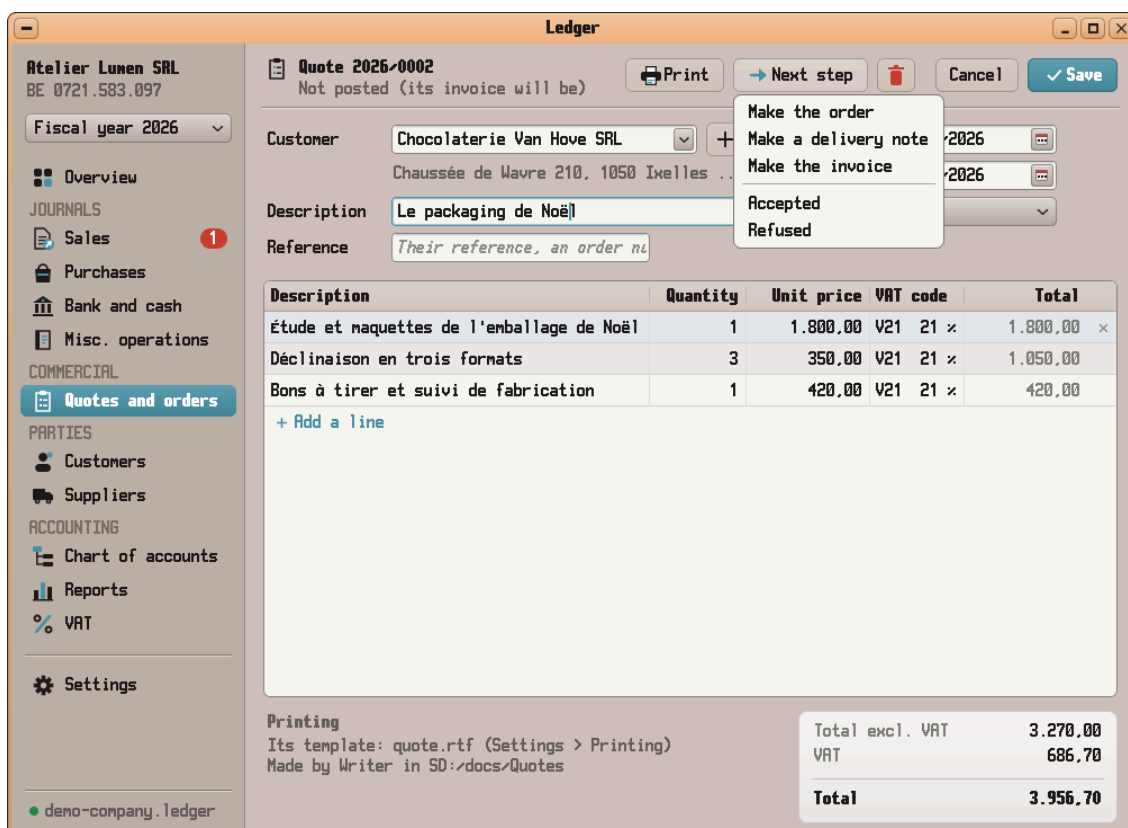

1. The **customer**, the **date**, **Valid until** (a quote) or **Delivery** (the others), a **description** — the quote's title on paper (*Le packaging de Noël*) —, the **state** and the customer's **reference**.
2. The lines: a **description**, the **quantity** (2, 5 hours), the **unit price** excluding VAT and the **VAT code**; the **total** is computed.
3. **Save**, then **Print** to make it in Writer (section 12).

The quote printed from its French template: the letterhead, the customer, the lines, the totals.

11.3 The next step

Next step turns the document into the next one:

A quote's next steps: the order, a delivery note, the invoice; accepted, refused.

- **Make the order** (a quote): an order with the same customer and lines; the quote is marked accepted.

- **Make a delivery note** (a quote or an order).
- **Make the invoice:** the sales invoice's page opens, filled — each line *2,5 x Design...* with its total, on the customer's usual account. Check it and **Save:** it is posted and the document is marked **Invoiced**.
- **Accepted** and **Refused** (a quote) record the customer's answer.

A document made from another says so on paper (*From Quote 2026/0001*). A **purchase order**'s next step makes the purchase invoice, to be completed with the supplier's number.

12. Printing documents from templates

12.1 How it works

Print — on a quote, an order, a delivery note, a purchase order, a sales invoice or credit note — writes the document's data and asks **Writer** to make the document from its **template**. Writer then shows it: print it, or save it again as `.docx` or `.odt`.

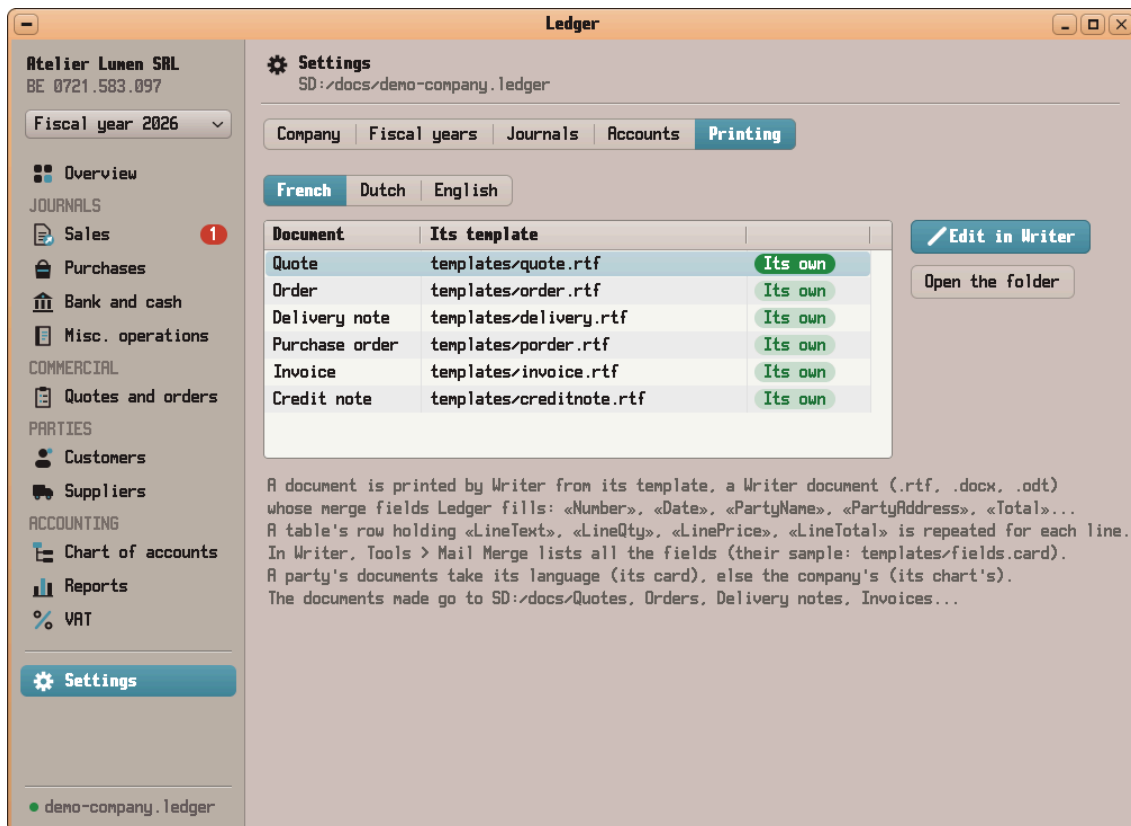

The documents made are kept in `SD:/docs`, a folder per kind — **Quotes, Orders, Delivery notes, Purchase orders, Invoices, Credit notes** —, named after their number and party (*Quote 2026-0002 Chocolaterie Van Hove SRL.rtf*).

12.2 Languages

Each template exists in **French, Dutch** and **English**. A party's documents take the language of its card, else the company's (its chart's). The words (*Facture, Factuur, Invoice*), the dates and the legal mentions follow.

12.3 Your own templates

A template is an ordinary Writer document — `.rtf`, `.docx` or `.odt` — whose **merge fields** Ledger fills. They are in `SD:/apps/ledger.app/templates`: the French ones in that folder, the Dutch ones in `nl`, the English ones in `en`, one per kind: `quote`, `order`, `delivery`, `porder`, `invoice`, `creditnote`.

The templates of each language: their own, or the French one used in their place.

In **Settings ► Printing**, choose the language and the document and click **Edit in Writer**. Change the look, the words, the conditions; add your logo (**Insert ► Image...** in Writer); move the fields. When a language has no template of its own (**French one**), Ledger offers to make it from the French one. **Open the folder** shows the templates in the File Viewer.

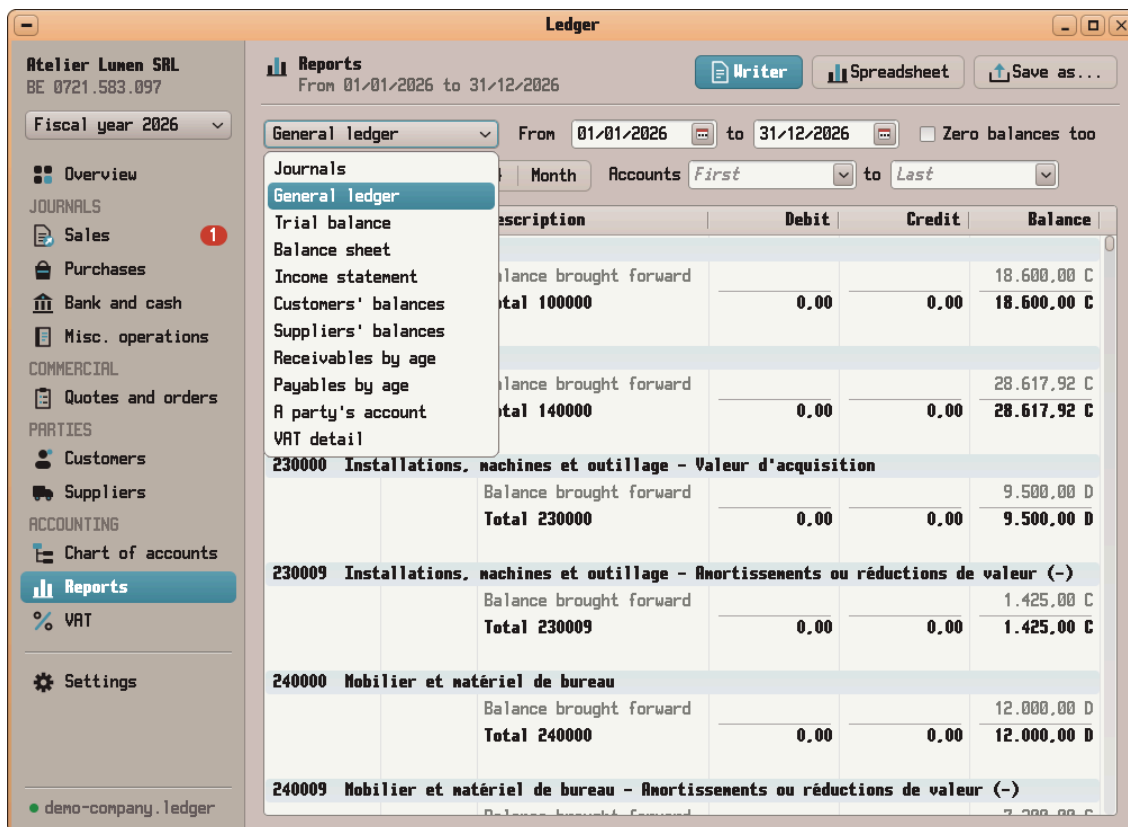

To add a field, use **Tools ► Mail Merge** in Writer: it lists all of Ledger's fields, with a sample's values. A **table row** that holds line fields (**LineText**, **LineQty...**) is repeated for each line of the document. Appendix B lists every field.

Tip. Keep a copy of a template before you change it. If one is spoiled, the original ones come back with a fresh copy of the Onyx card's apps/ledger.app/templates folder.

13. Reports

13.1 Choosing a report

Reports shows a report on screen; **Writer** opens it as a document to print (A4, landscape when it is wide, with its title and page numbers), **Spreadsheet** as a workbook, and **Save as...** writes it as a Writer document (.rtf), a workbook (.xlsx) or a CSV file — in `SD:/docs/Reports` by default.

The reports.

Choose the **report**, then its **period**: **Year**, **Q1** to **Q4**, **Month** (the current one), or dates typed in **From** and **to** (the balances: **At** a date). Double-click a line to open its document, its account or its party.

13.2 The reports one by one

Report	What it shows	Its options
Journals	Each document of the period with its entry's lines	A journal, or all
General ledger	Each account's lines, the balance brought forward and the running balance	A range of accounts; zero balances too
Trial balance	Each account's debits, credits and balance at a date	Zero balances too
Balance sheet	The assets and the liabilities, in the abbreviated scheme's headings	At a date
Income statement	The income and the charges, the result of the period	—

Report	What it shows	Its options
Customers' balances, Suppliers' balances	Each party's debits, credits, balance and overdue amount	At a date
Receivables by age, Payables by age	The open items by age: not due, 1–30, 31–60, 61–90, over 90 days	At a date
A party's account	A customer's or supplier's lines, with their due dates and matching	The party
VAT detail	The lines behind each grid of the VAT return	—

✓ The checks Intervat makes find nothing wrong.

☐ Ask for the refund ☐ Ask for payment forms

Q3 2026: the return's grids, computed from the books; the checks find nothing wrong.

Each period's state:

State	Meaning
Filed	Marked filed (on that day): its VAT entries are locked
Running	The period is not over
To file	Over, its return due (the 20th of the next month)
Late	Its due date is past
To come	Not begun

Click a tile — or use  and  — to see another period. The return is computed from the documents of the period, in the form's sections: **II** the operations (sales, grids 00 to 49), **III** the purchases (81 to 88), **IV** the VAT due (54 to 63, total **XX**), **V** the VAT deductible (59, 62, 64, total **YY**), **VI** the balance: **71** due to the State, or **72** due by the State. Click a grid, or **Detail**, to see the lines behind the grids (the **VAT detail** report of the period).

Below the form, **the checks Intervat makes** — a VAT due without its base, a credit note without an operation... When they find something, check it before filing.

14.2 Filing the return

1. Check the grids (and their **Detail**).
2. Tick **Ask for the refund** if grid 72 shows an amount the State owes you and you want it paid back; **Ask for payment forms** if you want the paper forms.
3. Click **Intervat XML** and save the file (in `SD:/docs/VAT` , *VAT return 2026-Q3.xml*).
4. On **Intervat** (intervat.minfin.fgov.be), upload the file and send the return.
5. Answer **Yes** when Ledger asks whether to mark the period filed.

For monthly returns, the December one shows grid **91**, the advance paid in December: type it there.

14.3 Marking filed, the settlement

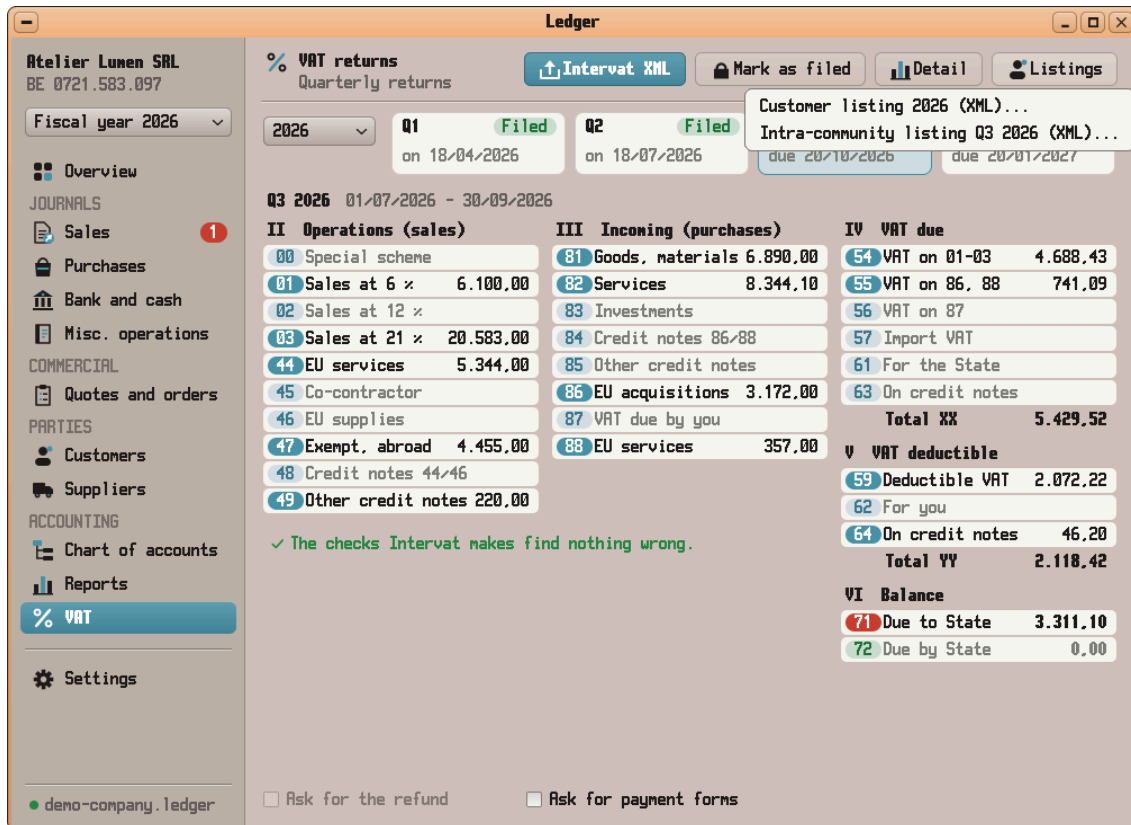

Mark as filed locks the period's VAT: its documents with VAT can no longer be changed, and the return's grids are kept as filed. Ledger then offers to post the **settlement**: a miscellaneous operation on the period's last day that moves the VAT due (451000) and the VAT deductible (411000) to the **VAT current account** — 451200 what you pay the State, 411200 what it refunds you.

When you pay the VAT, record the payment in your bank statement on account **451200**.

Reopen unlocks a period filed by mistake. A return already sent must then be corrected on Intervat too.

14.4 The listings

Listings makes the two other VAT files:

The annual customer listing and the intra-Community listing of the period.

- **Customer listing 2026 (XML):** the annual list of your Belgian customers subject to VAT who bought 250 EUR or more, due by March 31st of the next year. With no such customer, the listing is nil: say so in the year's last return — Ledger does it in that return's file.
- **Intra-community listing (XML):** your intra-Community supplies and services of the period, per customer's VAT number. A customer without a valid EU VAT number is left out, and Ledger tells you.

Upload them on Intervat as well.

14.5 Without VAT returns

With the **small business franchise**, you file no periodic return; the customer listing is still due. **Not subject to VAT:** no VAT file at all. The VAT page says so.

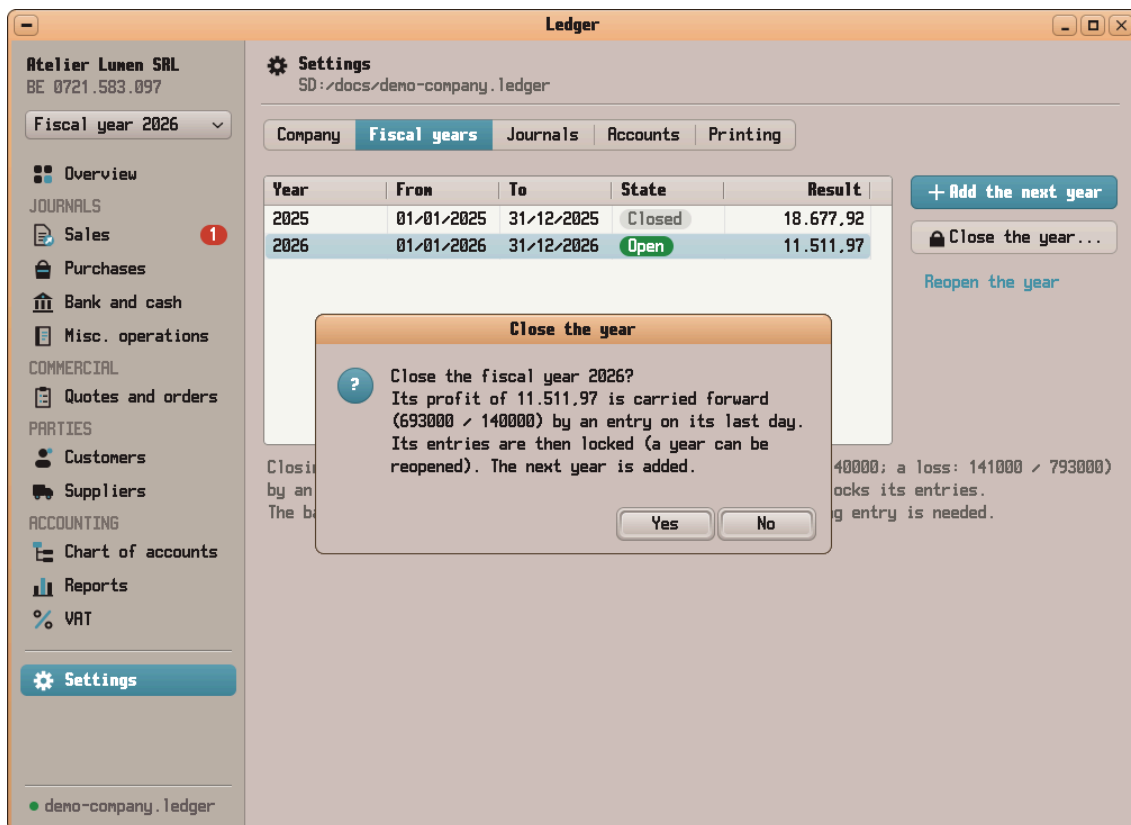

15. Closing the fiscal year

15.1 Before closing

- Record every document of the year: sales, purchases, all the bank statements up to the last day.
- File and mark filed the VAT returns of the year.
- Post the year-end entries with your accountant: depreciation, accruals and deferrals, provisions, stocks, taxes.
- Check the **Trial balance**, the **Balance sheet** and the **Income statement**, and give them to your accountant.

15.2 Closing

In **Settings ► Fiscal years**, choose the year and click **Close the year...** (or **Tools ► Close the Fiscal Year...**).

Closing 2026: its profit carried forward by an entry on its last day.

Ledger posts the **appropriation** of the result on the year's last day — a profit: 693000 debited, 140000 credited; a loss: 141000 debited, 793000 credited —, **locks** the year's entries and adds the next year if there is none. The balance sheet's accounts go on in the next year by themselves.

If your general meeting appropriates the result otherwise (a dividend, the legal reserve), post those entries in the next year (or before closing, with accounts 69x / 79x: Ledger then appropriates only what is left).

Reopen the year unlocks a closed year; its appropriation entry stays — delete it if the result changes, and close the year again.

16. Files and backups

Where	What
SD:/docs/<company>.ledger	The company's books: everything, in one file (you choose its name and place)
<company>.ledger.bak	The previous version of the books, kept at each change
SD:/docs/Quotes, Orders, Delivery notes, Purchase orders, Invoices, Credit notes	The documents printed
SD:/docs/Reports	The reports opened in Writer or the Spreadsheet
SD:/docs/VAT	The VAT returns and listings (XML)
SD:/docs/Payments	The SEPA payment files
SD:/apps/ledger.app/templates	The templates (nl , en : the Dutch and English ones)
SD:/apps/ledger.app/last.txt	The books opened last
SD:/apps/ledger.app/merge.card, merge-lines.card, merge.job	The data of the last document printed, for Writer

Back up your .ledger file regularly — at least after each VAT return — to a USB stick or another computer: it is your whole accounting. **File ► Save a Copy As...** writes a copy wherever you want.

The .ledger file is plain text (Latin-1): a [company] section, then [years], [journals], [accounts], [parties], [entries], [returns] and [documents], a tab between the cells. It can be read — and, in an emergency, mended — with any text editor. Keep a copy before touching it.

17. Questions and answers

I cannot change an invoice: it says "Locked". Its VAT return is filed or its year closed (section 3.4). Reopen the period (**VAT ► Reopen**) or the year only if the return or the accounts were not sent yet; otherwise post a credit note or a correcting operation now.

"Only the journal's last sales document can be deleted". Sales invoices keep an unbroken numbering. Make a credit note for the invoice (right-click ► **Make a credit note for it**).

"The date is in no fiscal year". Add the year in **Settings ► Fiscal years (Add the next year)**, or correct the date.

"The fiscal year shown is closed: choose another one". New documents go into the year shown in the side bar: choose the current year there.

An invoice paid still shows "Due" or "late". Its payment was recorded without being matched. In the customer's account, tick the invoice and the payment and click **Match** (section 5.3).

The statement does not balance ("Off by..."). A movement is missing or mistyped: compare the lines with the bank's statement. Leave the **New balance** empty to save it anyway.

The CODA import says "No bank journal has the account". Type the IBAN of that bank account in its journal (**Settings ► Journals**).

The VAT checks find something. Open **Detail**, find the document, correct it (its VAT code, its account's nature), and look again.

A customer's VAT number shows "Its check digits are wrong". Check it on the European VIES site; Ledger keeps it anyway if you insist, but Intervat will refuse it in the listings.

Writer shows "No template for this kind of document". A template is missing in `SD:/apps/ledger.app/templates`: copy it back from a fresh Onyx card.

Where is my invoice as a file? In `SD:/docs/Invoices`, named after its number and customer. Writer can save it again as `.docx` or `.odt`.

The dot at the foot of the side bar is red. The books could not be written (the card full or write-protected). Free some room, then **File ► Save a Copy As....**

18. Glossary

English	Français	Nederlands
Account	Compte	Rekening
Accountant	Expert-comptable	Accountant, boekhouder
Balance sheet	Bilan	Balans
Chart of accounts (PCMN)	Plan comptable minimum normalisé	Minimum algemeen rekeningenstelsel (MAR)
Credit note	Note de crédit	Creditnota
Customer	Client	Klant
Customer listing	Listing clients	Klantenlisting
Debit, credit	Débit, crédit	Debet, credit
Delivery note	Bon de livraison	Leveringsbon
Depreciation	Amortissement	Afschrijving
Due date	Échéance	Vervaldag
Entry	Écriture	Boeking
Fiscal year	Exercice comptable	Boekjaar
General ledger	Grand livre	Grootboek
Income statement	Compte de résultats	Resultatenrekening
Invoice	Facture	Factuur
Journal	Journal	Dagboek
Matching	Lettrage	Afpunten
Miscellaneous operation	Opération diverse (OD)	Diverse verrichting
Open item	Poste ouvert	Openstaande post
Order	Commande, bon de commande	Bestelling, bestelbon
Purchase	Achat	Aankoop
Quote	Devis, offre	Offerte
Reverse charge	Autoliquidation	Verlegging van heffing
Sale	Vente	Verkoop
Structured communication	Communication structurée	Gestructureerde mededeling
Supplier	Fournisseur	Leverancier
Trial balance	Balance des comptes	Proef- en saldibalans
VAT return	Déclaration TVA	Btw-aangifte
VAT number	Numéro de TVA	Btw-nummer

Appendix A. The VAT codes

Code	Name	Rate	Deductible	Grids (invoice)	Grids (credit note)
V21	Sales 21 %	21 %	—	03, 54	49, 64
V12	Sales 12 %	12 %	—	02, 54	49, 64
V6	Sales 6 %	6 %	—	01, 54	49, 64
V0	Sales 0 %	0 %	—	00	49
VCC	Sales, VAT due by the Belgian co-contractor	—	—	45	49
VEUG	Intra-EU supplies of goods	—	—	46	48
VEUS	Intra-EU services	—	—	44	48
VEUT	Intra-EU triangular sales (ABC)	—	—	46	48
VEX	Exports outside the EU	—	—	47	49
VX	Exempt (art. 44), not in the return	—	—	—	—
A21	Purchases 21 %	21 %	100 %	81/82/83, 59	81/82/83, 85, 63
A12	Purchases 12 %	12 %	100 %	81/82/83, 59	81/82/83, 85, 63
A6	Purchases 6 %	6 %	100 %	81/82/83, 59	81/82/83, 85, 63
A0	Purchases 0 % or exempt	0 %	—	81/82/83	81/82/83, 85
A21D50	Purchases 21 %, half deductible (cars)	21 %	50 %	81/82/83, 59	81/82/83, 85, 63
A21ND	Purchases 21 %, not deductible	21 %	0 %	81/82/83	81/82/83, 85
A12ND	Purchases 12 %, not deductible	12 %	0 %	81/82/83	81/82/83, 85
AEU21	Intra-EU acquisitions of goods 21 %	21 %	100 %	81/82/83, 86, 55, 59	81/82/83, 86, 84
AEU12	Intra-EU acquisitions of goods 12 %	12 %	100 %	81/82/83, 86, 55, 59	81/82/83, 86, 84
AEU6	Intra-EU acquisitions of goods 6 %	6 %	100 %	81/82/83, 86, 55, 59	81/82/83, 86, 84
AEUS21	Intra-EU services received 21 %	21 %	100 %	81/82/83, 88, 55, 59	81/82/83, 88, 84
ACC21	Belgian co-contractor (reverse charge) 21 %	21 %	100 %	81/82/83, 87, 56, 59	81/82/83, 87, 85
ACC12	Belgian co-contractor (reverse charge) 12 %	12 %	100 %	81/82/83, 87, 56, 59	81/82/83, 87, 85
ACC6	Belgian co-contractor (reverse charge) 6 %	6 %	100 %	81/82/83, 87, 56, 59	81/82/83, 87, 85

Code	Name	Rate	Deductible	Grids (invoice)	Grids (credit note)
AWS21	Services from outside the EU 21 % (reverse charge)	21 %	100 %	81/82/83, 87, 56, 59	81/82/83, 87, 85
AIM21	Imports, VAT deferred (ET 14000) 21 %	21 %	100 %	81/82/83, 87, 57, 59	81/82/83, 87, 85
R61	Regularisation for the State	—	—	61	61
R62	Regularisation for the declarant	—	—	62	62

Grid 81, 82 or 83 is the purchase account's nature: goods, services or investments (section 4.5).

Appendix B. The merge fields

The fields a template can hold — typed in Writer as merge fields (**Tools ► Mail Merge**). The fields ending in **Line**, **Address**, **Contact** and **Text** are made to be printed as they are: a label and its value, in the document's language, or nothing at all when there is no value.

The document

Field	What it holds
Kind	The document's kind, in its language: <i>Devis, Factuur, Invoice...</i>
Number	Its number: <i>2026/0002</i>
Date	Its date
Until	A quote's validity, an order's delivery date
UntilLine	<i>Valable jusqu'au 15/10/2026</i>
DueDate	An invoice's due date
Reference, ReferenceLine	The party's reference; with its label
Text	The description
Communication	An invoice's structured communication
Terms, TermsText	The payment terms in days; as printed (<i>30 jours, comptant</i>)
FromDocument, FromLine	The document it was made from; with its label
TotalNet, TotalVAT, Total	The totals
VATDetail	The VAT by rate, and the legal mentions of reverse charges and exemptions
FileName	The name of the document written

The company

Field	What it holds
CompanyName, CompanyLegal	The name, the legal form
CompanyStreet, CompanyZip, CompanyCity, CompanyCountry, CompanyAddress	The address (CompanyAddress: its lines)
CompanyVAT, CompanyVATLine	The VAT number; with its label
CompanyEmail, CompanyPhone, CompanyWeb, CompanyContact	The contacts (CompanyContact: all of them)
CompanyIBAN, CompanyBIC, CompanyBankLine	The bank; as a line
CompanyRegister, CompanyLegalLine	The register; the legal line — name and form, address, VAT number, register

The party

Field	What it holds
PartyName, PartyCode	The customer's or supplier's name, its code
PartyStreet, PartyZip, PartyCity, PartyCountry, PartyAddress	Its address
PartyVAT, PartyVATLine	Its VAT number; with its label
PartyEmail, PartyPhone	Its contacts

The lines — in a table row, repeated for each line

Field	What it holds
LineNo	The line's number
LineText	Its description
LineQty	The quantity
LinePrice	The unit price, excluding VAT
LineVAT	The VAT rate
LineTotal	The total excluding VAT
LineTax	The VAT
LineGross	The total including VAT

Appendix C. Keyboard reference

Keys	Where	What they do
Ctrl+N	Everywhere	A new document of the page shown (a new card, a new account...)
Ctrl+S	A document	Save it
Esc	A document	Leave it (Ledger asks when something was typed)
Ctrl+F	A list	Go to the search box
Ctrl+O	Everywhere	Open another company's books
Enter	A list	Open the chosen row
Delete	A list	Delete the chosen row
Space	A party's account, a statement's items	Tick or untick the chosen line
Tab , Enter	A document's lines	The next cell; after the last one, a new line
Shift+Tab	A document's lines	The cell before
↑ , ↓	A document's lines	The line above, below
F4 , Alt+↓	A party, account or VAT code cell	The list of what can be typed
Ctrl+Delete	A document's lines	Remove the line
← , →	The VAT page	The period before, after
